## BUOYANT

[ˈbɔɪ.ənt]

adj., cheerful and optimistic

*She remained buoyant despite the setbacks.*

**THOUGHT OF THE DAY**

***"If students can feel the past, they'll remember it forever."***

—Mr. Gallego

## SCAD Polytechnic College Hosts Skill Training for 12th Standard Students from Own Modern Higher Secondary School, Pettai

On 05th December 2025, SCAD Polytechnic College organized an insightful Skill Training Program for School Students, specifically designed for 12th standard students. A total of 23 students from Our Own Modern Higher Secondary School, Pettai, participated in the program, which aimed to enhance their readiness for higher education and future career pathways.

The training comprised two key sessions: Basics of Electronics, delivered by experts from the EEE Department, and MS Office and Excel, conducted by the CSE Department. Students were introduced to fundamental concepts of electronic circuits and components, along with essential computer skills required for academic and professional environments.

The program was effectively conducted by Mr. Arockia Raj, Lecturer, Department of EEE, who facilitated engaging demonstrations and interactive learning activities. This initiative reflects SCAD Polytechnic College's commitment to promoting technical awareness and digital literacy among school students, encouraging them to explore engineering and technology-based education with confidence.

Academic Spotlight

**SCAD Polytechnic College Organizes Skill Training to Enhance Technical Expertise Among First and Second-Year Students**

SCAD Polytechnic College conducted a comprehensive Skill Training Program on 05 December 2025 to strengthen the practical knowledge and technical skills of first and second-year students. The initiative aimed to provide hands-on training in core engineering domains, ensuring students gain industry-relevant exposure at an early stage of their academic journey.

The Mechanical Engineering department offered specialized sessions on TIG/MIG Welding and Servicing of Two and Three Wheelers, enabling students to understand fabrication techniques, welding processes, and vehicle maintenance procedures. These activities helped participants develop essential workshop skills and improve their understanding of automotive systems.

Meanwhile, the Electronics and Communication Engineering department focused on Electronics Circuit Design, where students were introduced to fundamental circuit components, design principles, and basic troubleshooting techniques. The training provided them with a strong foundation in electronics engineering and supported the development of innovative thinking.
