SCAD Polytechnic College Conducts Multi-Department Skill Training for First and Second-Year Students

SCAD Polytechnic College organized an extensive Skill Training Program on 16 December 2025 at the college campus for first and second-year students, focusing on enhancing practical knowledge and industry-relevant competencies across various engineering disciplines. The program aimed to bridge the gap between theoretical learning and real-world applications through hands-on and advanced technical sessions.

The Mechanical Engineering department conducted training on ARC & Spot Welding and 3D Modelling, enabling students to gain practical exposure to fabrication techniques and digital design tools used in modern manufacturing industries. The Computer Department offered specialized sessions on Advanced C and Advanced HTML for first-year students, strengthening their programming skills and foundational knowledge in software development and web technologies.

Students from the Electrical and Electronics Engineering (EEE) department participated in Simulation Level 2, which enhanced their understanding of circuit analysis and virtual testing methods. Meanwhile, the Civil Engineering department trained students in Building Plan Approval Drawing, providing insight into professional drafting practices and regulatory standards.

The program reinforced SCAD Polytechnic College's commitment to holistic education, skill enhancement, and preparing students for future academic and industrial challenges.
