Skill Training Program Conducted for I Year Students at SCAD Polytechnic College

A comprehensive Skill Training Program for I Year students was successfully conducted on 03 February 2026 at SCAD Polytechnic College with the aim of strengthening students' technical competencies and practical knowledge. The program was jointly organized by the Mechanical Department and the Computer Department, focusing on both core engineering and IT skills.

The Mechanical Department covered essential and industry-relevant topics such as AutoCAD 2D, 3D Modelling, CNC Programming, and Arc & Spot Welding. These sessions helped students understand design principles, manufacturing processes, and modern workshop practices through hands-on exposure and demonstrations. Students gained valuable insights into drafting, modelling, and fabrication techniques widely used in the mechanical industry.

In parallel, the Computer Department conducted training on Advanced C and Advanced HTML, enabling students to strengthen their programming fundamentals and web development skills. The sessions emphasized logical thinking, coding practices, and real-time application development.

The training program witnessed active participation from students, who showed great enthusiasm and interest throughout the sessions. This initiative reflects SCAD Polytechnic College's commitment to holistic skill development and preparing students to meet current industry and technological demands effectively.
