that makes sense; that fits the facts

He's late again? Yeah, that tracks.

Skill Training Program Enhances Technical Competence of First Year Students at SCAD Polytechnic College

A comprehensive Skill Training Program for First Year Students was successfully conducted on 10 February 2026 at SCAD Polytechnic College with the objective of strengthening practical knowledge and industry-oriented skills among students. The program was carefully designed to bridge the gap between theoretical learning and real-time industrial applications.

As part of the training, students from the Mechanical Department received hands-on exposure in AutoCAD 2D and 3D Modelling, CNC Programming, and Arc & Spot Welding. These sessions helped students understand modern design techniques, manufacturing processes, and welding practices that are widely used in core industries. Experienced faculty members guided the students through practical demonstrations and interactive sessions.

Simultaneously, the Computer Department organized advanced technical sessions on Advanced C Programming and Advanced HTML. These modules focused on strengthening programming logic, problem-solving skills, and web development fundamentals, preparing students for future academic and professional challenges.

The training program witnessed enthusiastic participation from first year students, who actively engaged in all sessions. The event played a vital role in enhancing students' confidence, technical proficiency, and readiness for advanced learning, reflecting SCAD Polytechnic College's commitment to quality skill-based education.

UPCOMING EVENTS

- * SKILL TRAINING FOR ECE AND EEE STUDENTS

FEB 11, 2026

- * VICE CHAIRPERSON BIRTHDAY

FEB 11, 2026

- * NAAN MUDHALVAN FOR ECE STUDENTS
