SKILL TRAINING FOR SCHOOL STUDENTS

Academics and skills are important factors at SCAD Polytechnic College. For the purpose of equipping students with employability skills, various skill development activities are conducted on the college's premises every year. This year, it's also planned to conduct a one-week skill training programme for high school students. Today (04/05/2023), is the second day of a one-week skills training program, and the department of Automobile gave them basic training in Two Wheeler Servicing. Students actively participated in this program and gave their feedback.
