The monotony of the workplace is broken up by skill training, which also sparks enthusiasm in improving performance and utilizing novel approaches to reach new heights. The practical experience expands even further the range of applications for which the knowledge acquired during training can be used. On our campus, we are providing skill training to the students. 125 students from Govt HSS School Kalakad visited our facility on December 5th, where they learned about the organic garden, CCTV camera, CNC lab, and lathe lab. The students received a very clear explanation of the skills from our staff members.

## STAFF MEETING

A meeting is an essential component of every organization. Staff members can get together, share feedback, exchange ideas, and learn from one another in this way. However, team meetings also have a poor image. Not every attendee at a meeting is beaming. Staff members typically even detest the idea of team gatherings. However, this is because they fail to understand its advantages, which is most likely a result of the way the meetings are conducted. Dr. John Kennady led a meeting today with all of the department heads and vertical leaders and they discussed the welfare of the students.
